

Update March 24, 2020

Dear Patients,

As you all know, recommendations are changing daily. As of now, we plan to reopen April 20th, per the recommendation of the New Jersey Dental Association. We will be in touch with any patients this affects.

Why are we closed?

- To preserve PPE for the hospitals. We donated what we had to help the fight.
- We, as dentists, produce a lot of aerosols and do not have access to N-95 masks and other appropriate protective equipment to keep our staff safe right now.
- It's important for our patients to stay home to limit their risk of getting infected.

We truly miss our staff, our patients, and our community. We hope you understand that this is heartbreaking for us, but our priority is keeping everyone safe.
